PROJECTS

FitCal

Javascript, Chart.js   *August 2022- Present*

- Built out nutrition table that allowed users to quickly estimate their nutritional info of their dietary intake by pulling real data from a third party API and saving logged food items to client side storage.
- Leveraged Chart.js to ease the monitoring of users exercise progress via data visualization, focusing on workout frequency and lifted weight tracking.
- Managed team using agile methodologies and ensuring the project was polished and debugged by the deadline.
  Repository: https://github.com/Robdom87/FitCalv2   Deployed: https://fitcalxxii.herokuapp.com/

the_talking_tech

Handlebars, MySQL   *October 2022*

- Used Handlebars to dynamically present users post and comments, updating accordingly depending on any changes to those previously mentioned posts.
- Constructed routing to create, read, update, and delete data within your database on MySQL via URL requests.
  Repository: https://github.com/Robdom87/the_talking_tech
